

Osaka Prefecture University - Intelligent Media Processing Group

Segmentation and indexation of graphical complex objects from comic books

Christophe Rigaud

Visiting researcher from January 12 to March 23, 2013

Plan

- Institutions
- Project and dataset
- Thesis research
- Collaborations

Christophe Rigaud

Doctoral researcher (2nd year)

Segmentation and indexation of complex objects from comic books

Advisers: Jean-Christophe Burie¹, Jean-Marc Ogier¹
Dimos Karatzas²

¹**L3i**

- La Rochelle University (ULR)
- 80 members
- Image and document analysis group
 - Comics project

²**CVC**

- Barcelona University (UAB)
- 175 members
- Document analysis group
 - Comics team

Comics project

- L3i lab (La Rochelle, France)
- June 2011 – September 2014
- Participants: 2 PhD students, 5 assistant professors, 3 professors,
- Comic books:
 - Cultural heritage
 - Need to be valorized by the new technologies
- Objectives:
 - Augmented reading experience
 - Information retrieval (semantic query, full text)
 - Dataset for scientists

eBDtheque: comics database and ground truth

- Just submitted to ICDAR'13
- 100 ground truth pages
 - ~800 frames
 - ~600 balloons
 - ~4500 text lines
- <http://ebdtheque.univ-lr.fr/database/>

```
<component name="Balloon" type="Region">
  <metadata-list>
    <metadata name="rank" constrained="no" type="int"/>
    <metadata name="shape" constrained="yes" type="String">
      <item>cloud</item>
      <item>ovale</item>
      <item>peak</item>
      <item>rectangle</item>
      <item>none</item>
    </metadata>
    <metadata name="queueDirection" constrained="yes" type="String">
      <item>N</item>
      <item>NE</item>
      <item>E</item>
      <item>SE</item>
      <item>S</item>
    </metadata>
  </metadata-list>
</component>
```

Identifier: CYB_BUBBLEGOM_T02_010

Collection: Bubblegôm Gôm
Album: La Légende des Yaouanks
Page: 32

Drawer: Cyborg 07
Writer: Cyborg 07
Editor: Studio Cyborga
Release date: 2009
Language: french
ISBN: 979-10-90655-01-0
Website: [Link](#)

Definition (px): 750 x 1060

Panels: 16
Balloons: 19
Lines: 70

Segmentation and indexation of complex objects

- Frame detection
- Text localization
- Speech balloon detection
- Object detection

LUBBIN - Les Bulles du Labo - <http://bulles.doc-en-stock.fr/>

Segmentation and indexation of complex objects

- Frame detection
- Text localization
- Speech balloon detection
- Object detection

Connected components

Filtering

Connected component height

[1] Robust frame and text extraction from comic books

Christophe Rigaud, Norbert Tsopze, Jean-Christophe Burie, Jean-Marc Ogier

Lecture Note in Computer Science (LNCS), Graphics Recognition. New Trends and Challenges, vol. 7423, pp.129-138, 2013

Segmentation and indexation of complex objects

- Frame detection
- **Text localization**
- Speech balloon detection
- Object detection

LUBBIN - Les Bulles du Labo - <http://bulles.doc-en-stock.fr/>

Text localization [2]

- Minimum Connected Component Thresholding
- Text graphic segmentation
- Text line localization (consecutive alignments)
- 75% recall and precision

Contrast
(std dev. > 60%)

Black on white

Neighbourhood
(min. 1 neighbour)

Overlapping
(< 30% with other CC)

[2] Automatic Text Localisation in Scanned Comic Books

Rigaud, Christophe and Karatzas, Dimosthenis and Van de Weijer, Joost and Burie, Jean-Christophe and Ogier, Jean-Marc
Proceedings of the 8th International Conference on Computer Vision Theory and Applications (VISAPP), 2013

Segmentation and indexation of complex objects from comic books

- Frame detection
- Text localization
- **Speech balloon detection**
- Object detection

LUBBIN - Les Bulles du Labo - <http://bulles.doc-en-stock.fr/>

Speech balloon detection [3]

- Closed and suggested balloon
- Active contour from text area
- 92% recall and precision

[3] An active contour model for speech balloon detection in comics

Rigaud, Christophe and Karatzas, Dimosthenis and Van de Weijer, Joost and Burie, Jean-Christophe and Ogier, Jean-Marc
Pending acceptance...

Segmentation and indexation of complex objects from comic books

- Frame detection
- Text localization
- Speech balloon detection
- **Object detection**

LUBBIN - Les Bulles du Labo - <http://bulles.doc-en-stock.fr/>

Object detection

- Aim: localize important character in comic books
- Ideas of research
 - Keypoint detection (e.g. SIFT, HOG)
 - Adjacency/topology frame description
 - Subgraph matching
- Collaborations

Collaborations

- 08/2012 - agreement for scientific cooperation with La Rochelle University
- 09/2012 - research stay of Masaki, Atsushi, Motoi and Weihang (La Rochelle)
- 10/2012 - research stay of Elodie (Osaka)
- 01/2013 - research stay of Romain and Christophe (Osaka)
- 02/2013 - manga pages for eBDtheque dataset
- 03/2013 - character detection in comics???
